

HB 400/401

WINDOW HANDLES

The HB400 and HB401 Window Handles are designed for use with aluminium, timber, or steel joinery. These can be used on both side or top hung (awning) windows in various configurations as shown below. For use with weather seals additional packers are available in 3mm and 5mm thicknesses.

For double windows with no central mullion extended tongues can be made on request.

Material: Forged brass with stainless steel fasteners

Please check with your local Halliday + Baillie representative as not all finishes are available in all regions.
