

*Screw fixing kits as shown for timber joinery

halliday baillie

TIMBER: The black outline is the overall size of flush pull furniture. Cut line for mortice hole is the longer red dotted line (235mm). Cut depth is 13mm. Radius of corners is 4mm. Please note a 1mm tolerance for cut depth has been included. Fix grub screws into top timber fixing kit to hold flush pull in place.

ALUMINIUM: The black outline is the overall size of flush pull furniture. Cut line is the shorter interior red dotted line (220mm). **Timber fixing kits not required for aluminium joinery.** Fix grub screws directly behind extrusion to hold in place.

HB665 & HB668 FLUSH PULLS
 To scale when printed at A4 July 2014

Foldline for door edge at 55mm backset
