

RP86

M

A weather proof door bottom seal, that is used by OEM joiners in situations where maximum weather protection is required. The multi blade seal defies rain infiltration.

RP86 is fitted to the square cut bottom of a door, provided there is a gap of 19-20mm prior to installation (flat sill).

It is quick and easy to fit to both door and sill.

RP86 can be fitted by builders, but is primarily designed for volume joinery fabrication.

Location Door bottom of butt hinged timber doors.

Min/Max Gap Flat sills 19mm to 20mm. Rebated sills 14mm to 15mm.

Seal Sizes available
Tops; 820mm, 870mm, 1000mm
Threshold plate; 826mm, 1000mm, 1660mm.
