

BSI 100 SERIES

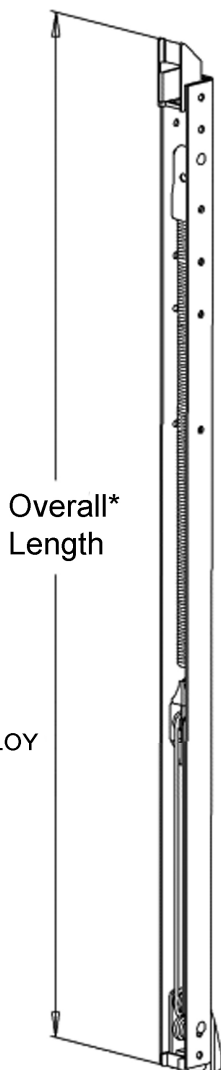

The BSI 100 Series is a superior quality block and tackle balance take-out system designed for ease of installation, operation and removal. It is adaptable to most single and double hung aluminium or uPVC windows for either new or replacement applications.

Options:

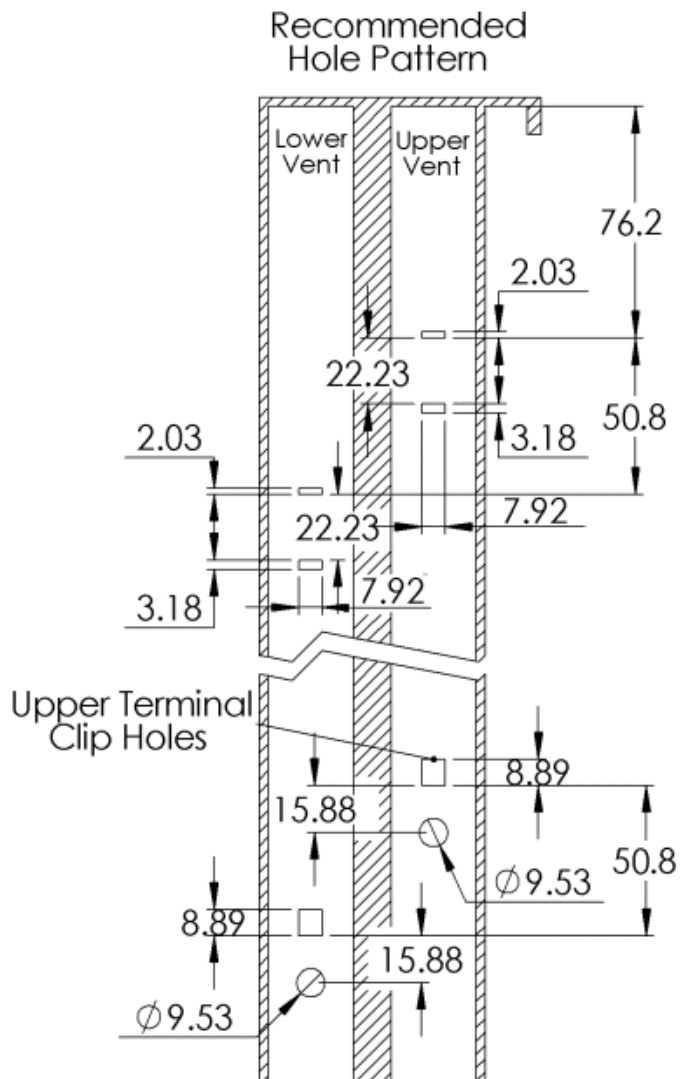

- A variety of balances are available for specific sash weights and sizes.

Features:

- Fast, easy installation of balances - no tools required.
- Balances are engineered and manufactured for specific sash weights and sizes and require no adjusting during or after installation, significantly reducing labour costs.
- Balances are designed to travel full balance length allowing balance lengths to be the same for both upper and lower vents.

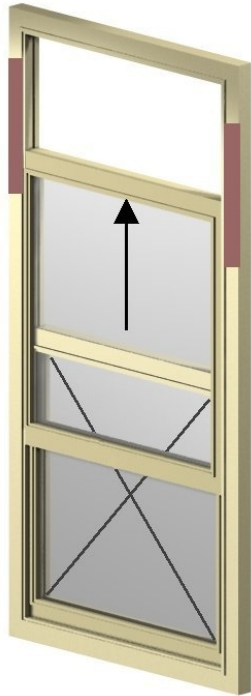

*See ASSA ABLOY Price Page for product details

BSI 100 SERIES
